Placement of
Characters on Keys:

Diacritical Marks:

- There are three vowel-doubling signs: ̊ (shift-A) for over ɓ only, and two for other vowels, ̋ (shift-I) over letters, and ̌ (shift-D) (below line, between or after letters).
- Use the apostrophe ʼ on shift-n for elision (ɣʼɛ). The apostrophe on ' is the English single quote.

ZWNJ: Zero-width non-joiner (shift-J). Enters an invisible character that stops letter joining.

- For short portions of isolated-character text, type shift-J before each letter.
- For long portions of isolated-character text, use the Fulfulde - Aissata font, or type linked text in the Fulfulde - Fuuta font, select the text, and change the font to Fulfulde - Aissata.

ZWJ: Zero-width joiner (shift-H). Type shift-H (zwj) after isolated character to force initial, before isolated character to force final, or before and after isolated character to force medial.
